Description This is the 800hp industrial/marine cam used in C16 and C18 Cat Engines. This is a drop in camshaft for 3406E/C15 engines looking for more performance out of their engine. We have used this cam in many of our own builds in the shop and have had great results.

## **3406E - C15 800hp Camshaft - enhanced power product**

To replace the camshaft on a C15 engine, you will first need to drain the coolant and remove the radiator. The reason is because the cam must come straight out the front of the engine. Next you will remove the Jake's rocker arms. Then remove the small peanut cover off the front of the engine. Then remove the cam gear and the idler gear it connects to.
