phenomena in international relations occur as a result of decisions made by people.

Game Theory and Interstate Conflict - International ...

The relevance of the theory for international relations (IR) goes undisputed; it is a truism to assert that states interact by trying to predict other states' reactions to their decisions. Yet one has to apply the theory to IR, because the tool of game theory cannot produce by itself insight about IR.

A Short Note on the Use of Game Theory in Analyses of ...

jective requires treating game theory as a theory of international politics in terms of the goal-seeking behavior of states in an interdependent international system. It means that game models will not be useful in predicting outcomes that are largely determined by nonpurposive or nonsystematic behavior. If all or most cases are determined by such
