Types of Reactions Worksheet - Alabama School of Fine Arts

The main four types of reactions are direct combination, analysis reaction, single displacement, and double displacement. If you're asked the five main types of reactions, it is these four and then either acid-base or redox (depending who you ask). Keep in mind, a specific chemical reaction may fall into more than one category.

Types of Chemical Reactions (With Examples)

Good job! You completed the quiz, so you've seen examples of the different types of chemical reactions. If you're still a bit shaky on how to tell the types of reactions apart or if you just want more examples, you can review the main reaction types. If you're ready to try another quiz, see how familiar you are with the units of measurement.
